

Let's Learn About

# Kaolin Clay

**Kaolin was formed about 70 million years ago when dinosaurs roamed the earth. Color the dinosaurs!**

1 = red

2 = yellow

3 = blue

4 = green

5 = brown

6 = black

7 = orange

8 = purple

**Kaolin clay can be found all over the world, but two of the world's most important deposits of kaolin are located in Georgia and Brazil.**

**Between 50 and 100 million years ago, dinosaurs like Dino roamed the earth during geological periods know as the *Cretaceous* and *Tertiary* periods. Color Dino and Pebbles!**

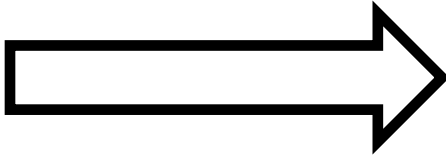

During these periods, the Atlantic Ocean covered southern Georgia. If you connect the dots below, you can see where the shoreline was. Our clay deposits are found along this line today!

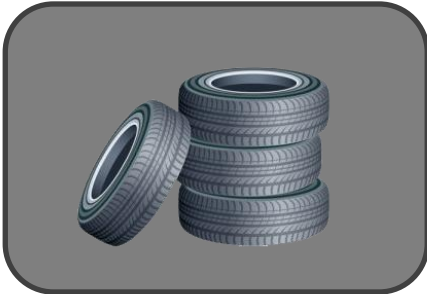

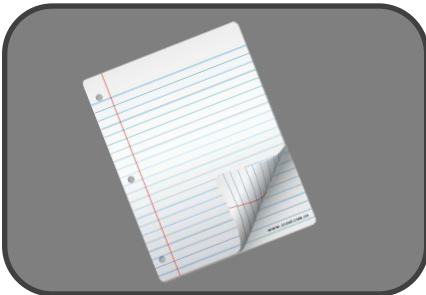

# DID YOU KNOW?

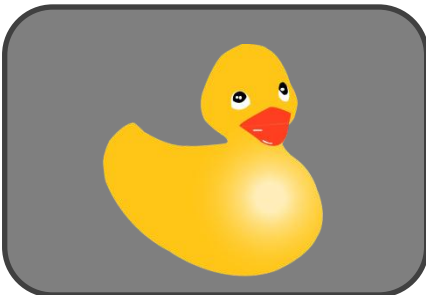

Kaolin is used in many products that you are around every day.

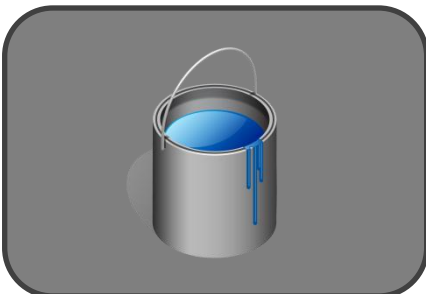

**Tires**

**Paper**

**Rubber**

**Paint**

**Kaolin is used to make a variety of products. Help Dino find some!**
